

Name: _____

Cell Organelles

**CELL BIOLOGY****Match each cell organelle with its correct function**

Mitochondria

Protein and fat production

Nucleus

Chemical energy production

Golgi Apparatus

Structural support in plant cells

Endoplasmic Reticulum

Regulates materials in/out

Vacuole

Cell storage & waste management

Chloroplast

Stores the genetic material (DNA)

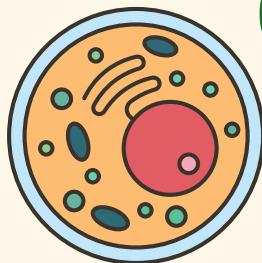

Cell Membrane

Packs protein & fat for transport

Cell Wall

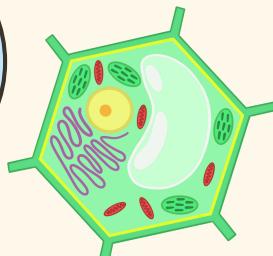

Photosynthesis in plant cells

ANSWER KEY

Cell Organelles

CELL BIOLOGY

Match each cell organelle with its correct function

Mitochondria

Protein and fat production

Nucleus

Chemical energy production

Golgi Apparatus

Structural support in plant cells

Endoplasmic Reticulum

Regulates materials in/out

Vacuole

Cell storage & waste management

Chloroplast

Stores the genetic material (DNA)

Cell Membrane

Packs protein & fat for transport

Cell Wall

Photosynthesis in plant cells
